

### New SONOTUBE® fibre forms

Sonoco® engineers applied a century of leadership in design, technology and manufacturing to create a high-strength, rain-resistant design for the Sonotube® forms. The new Rainguard™ technology allowed Sonoco® to increase the rain resistancy of the forms enabling them to stand strong against a frequent contributor to construction delay - inclement weather conditions. Now contractors can stay on schedule by setting the concrete forms and pouring columns even in wet weather conditions.

### BENEFITS IN BRIEF

- **Increased resistance:** more reliable in humid and wet conditions
- **Lighter:** easier to carry and maintain
- **Stronger:** for improved column straightness
- **Recyclable:** contributing to environmental sustainability

Featuring Sonoco's patent-pending Rainguard™ technology

- Concrete columns with a very smooth, finish-free surface
- Coated on the inside with Duraglas™
- Saves time and labour
- Maximum length 4 m (Ø 200-250) or 6 m (other Ø)

← Leaves no marks

### SONOTUBE Polygonal™

Featuring Sonoco's patent-pending Rainguard™ technology

- Smooth surface
- Use of high density polystyrene ensures perfect columns

← With or without chamfer

**Square and Round with dilatation joint**

Sonotube Plus finish, 2 or 4 cm joint depending on diameter
